### IMPRESSION:

- Single Live Intrauterine Gestation of 12 Weeks $\pm$  6 Days.
- ?Wrong dates
- All the fetal congenital anomalies cannot be detected by ultrasound due to various reasons, such as maternal abdominal wall thickness, liquor volume, fetal position, gestational age and other technical causes hence it cannot be taken for granted that the fetus is absolutely normal, this report is not valid for medicolegal purposes.

For clinical correlation/follow up

21/6/2021  
Date of Birth: 01/01/2024  
Weight: 14.5 kg
