NAME : MRS. SURBHI A/S : 30 Y/F DATE : 21/02/2022

REF. BY : DR. SUDHA CHOUBEY

CLINI. DIA. : ANC LMP- 07/10/2021 GA BY LMP- 19 WKS 4 D

USG OBSTETRICS & TARGET SCAN

Single live fetus seen inside the uterine cavity

Fetal cardiac activity visualized and recorded : 142 Beats / min

Fetal movement : Seen Fetal body and limb movements are normal .

Fetal breathing movements are normal.

Fetal cardiac activity present, four chambers are seen in fetal heart. No evidence of Echogenic intracardiac focus seen . Fetal cardiac anomalies can not be excluded.

Fetal scalp is intact ,fox appears normal No evidence of dilatation of ventricles seen in fetal head. Cisterna magna and cavum septum pellucidum appears normal in fetal brain. Fetal spine appears normal. Nuchal fold thickness 1.8 mm with in normal limits. Fetal kidney appears normal ,no evidence of hydronephrosis seen .

Stomach ,urinary bladder appears normal. Posterior abdominal wall intact.

Facial features appears normal . Nasal bone appears normal .

Fetal congenital anomalies can not be completely excluded.

FETAL PARAMETERS ARE.:

BPD 42.42 mm — 18 Weeks 5 Day

FL 28.25 mm - 18 Weeks 5 Day

AC 137.90 mm - 19 Weeks 1 Day

MGA 18 Weeks 6 Day

EDD BY USG : 19/07/2022 Estimated Foetal Wt. : 266.27 gms $\pm$ 39.94 gms

PRESENTATION : CEPHALIC (at the time of examination)

PLACENTA : Single, attached to posterior wall ,uppersegment and maturity grade 1 .

No evidence of placenta previa or retroplacental clot seen .

3 vessel umbilical cord seen . LIQUOR : Adequate

Internal os— (7 mm) .Dimention of cervix : 3.0x1.2 cm .

IMPRESSION : Single live fetus with mean gestational age by sonography is 18 wks 6 day seen in uterine cavity with regular cardiac activity. Fetus showing cephalic presentation and fetal weight is 266.27 gms $\pm$ 39.94 gms. Target scan shows no obvious evidence of gross, detectable structural or congenital anomalies at this time of gestation.

(study of detailed fetal anatomy may not always be possible due to technical difficulties related to fetal position, amniotic fluid volume, fetal movements & maternal abdominal wall thickness. Therefore all anomalies may not be detected in every examination.)

I have neither detected nor disclosed the sex of her fetus to anybody in any manner. Advise : Follow up ultrasound.

Dr. (Smt.) Seema Chanpuria
M.D. Radiodiagnosis

Declaration by the Doctor / Persons Conducting usg / Image Scanning

I, Dr. (Smt.) Seema Chanpuria declare that while Conducting USG / Image Scanning on
Mrs. Surash I have neither detected nor disclosed the sex of her foetus to any body in any manner.
