

SAMARTH SONOGRAPHY CENTRE

DR. DEVYANI BAWANKAR
MBBS, MD (Radio-diagnosis)
Reg. No. : 2014/06/2714

Timing : Morning 11 am to 2 pm
Evening 5 pm to 8 pm

NAME : MRS. KALPANA THWAKAR
AGE / SEX : 29 YRS / FEMALE.
REF. BY : DR. KAVITA PIMPALSHENDE
EXAMINATION : USG - OBSTETRIC (NT SCAN)
DATE : 01 / 03 / 2022

SONOGRAPHY OF GRAVID UTERUS

Single viable intrauterine fetus with variable presentation at the time of examination.
Fetal movements and cardiac pulsations are well appreciated.
Fetal Heart Rate: 151 Beats/ min.

LMP: 01/12/2021

According to LMP the gestational age corresponding to 12 Weeks 6 Days.
The crown rump length measures 7.74 cm corresponding to 14 Weeks 0 Days

Expected date of delivery (E.D.D) according to this ultrasound examination is 30/08/2022.

NT: 1.35 mm

Nasal bone is ossified.

Ductus venosus flow is normal.

Placenta: Location: Left lateral wall, Maturity Grade: 0
Lower edge of placenta reaches upto internal os.

Fetal cerebral hemispheres, ventricles, spine, stomach and limbs appear normal.
There are no obvious gross congenital anomalies detected.

Liquor is adequate for gestational age.

Cervix length is adequate and measures 3.1 cm. No obvious evidence of cervical incompetence.
Internal os closed during examination.

Uterine artery screening Doppler study shows mean PI : 1.2

Opinion:

- Single viable intrauterine fetus with variable presentation at the time of examination.
- The average sonic maturity of fetus corresponds with 14 weeks 0 days.
- Low lying placenta.

Declaration: I have neither detected nor disclosed the sex of the fetus of pregnant women to anybody as laid in rule 10 (1A)

Note -

- 1) This is a Professional Opinion only and not the final Diagnosis.
- 2) No ultrasonography finding is pathognomonic, all findings are only suggestive, hence they should be reviewed with the relevant clinical examination & relevant investigations before embarking upon the final Diagnosis and proceeding for Management (Medical or Surgical).
- 3) Not all gross congenital anomalies of fetus are apparent during scanning due to difficult & variable position attained by the fetus. Hence this USG scan cannot exclude all gross congenital fetal anomalies. Fetal cardiac anomalies are not included, ask for fetal echocardiography whenever suspected.
- 4) Whenever suspect congenital anomalies, ask for targeted scan along with serum alpha fetoprotein estimation.
- 5) In case of Disparity between clinical and Sonography/X-ray findings, please send patient again for review.
- 6) This report is not valid for medico legal purposes.
- 7) Subject to Nagpur Jurisdiction only.

Barcode - 23029890
