DR. KAMOD KONDAWAR

MBBS, DMRE

Consultant Radiologist and Sonologist
MMC Reg. No. 2015/04/211

Time : 9.30 am to 4.00 pm and 5.00 pm to 8.30 pm

Patients Name : MRS. KARISHMA RAJU MELE
Referred by : Dr. MAHENDRA LODHA SIR
Examination : USG - Obstetric NT Scan

Age: 27 YEARS / F
Date: 21 Mar 2022

OBSERVATION:

- #> Urinary bladder partially full.
- #> Single live intrauterine fetus is seen with CRL 64.2 mm corresponding to 12 weeks 6 days.

GA by USG	12 weeks 6 days
EDD by USG	27/09/2022

LMP	21 Dec 2021
GA by LMP	12 Weeks and 6 Days.
EDD by LMP	27 Sep 2022

- #> Cardiac activity is seen with FHR 158 BPM.
- #> Fetal movements are well appreciated.
- #> Gestational sac is regular. Choriondecidual reaction is good.
- #> Placenta is forming posteriorly. Retroplacental zone appears normal.
- #> Amniotic fluid is adequate.
- #> NT appears normal measuring 1.5 mm.
- #> Nasal bone is seen. Ductus venosus flow appears normal.
- #> Right uterine artery PI - 2.2. Left uterine artery PI - 2.46. Mean PI - 2.33 (93 percentile - Normal).
- #> Normal choroid plexus, ventricles and falx. Skull vault, upper and lower extremities are visualized.
- #> Cervical length is normal, measure 3.2 cm. Internal os is closed.
- #> No free fluid in Cul-De-Sac.

IMPRESSION:

Sonic findings suggest single live intra-uterine pregnancy with CRL corresponding to 12 weeks 6 days gestational age. NT appears normal.

I declare that while undergoing ultrasonography/image scanning on this patient, I neither detected nor disclosed the sex of fetus to anybody in any manner.
All measurements including estimated fetal weight are subject to statistical variations.
THIS IS ROUTINE LEVEL ONE USG SCREENING & THIS DOES NOT INCLUDE FETAL ANOMALY SCANNING. FETAL ANOMALY SCANNING SHOULD BE ADVISED TO PATIENT AS PER CLINICAL NEED.
Not all anomalies can be detected on sonography. This scan does not include fetal ECHO.
Investigations have their limitations. Solitary radiological / pathological and other investigation never confirm the final diagnosis of disease. They only help in diagnosing the disease in correlation to symptom and other related tests. Please interpret accordingly.
