MBBS (NKPSIMS)

DMRD - Govt Medical College, Nagpur

DNB - Breach Candy Hospital, Mumbai

Patients Name : Mrs. Priya Ingle
Age : 27 Years / F
Referred by : Dr. Kavita Pimpalshende
Examination : USG - ANC NT Scan
Date : 20/April/2022

Wt. 43 kg

Ht. 5.0

DOB - 15/4/196

LMP - 22/1/22

OBSERVATION:

- #> LMP : 22/01/2022 (12 weeks, 4 days).
- #> Uterus is bulky, containing single gestational sac.
- #> Fetal pole is seen with CRL measuring 51 mm corresponding to 11 weeks, 6 days.
- #> Choriondecidual reaction is good.
- #> Cardiac activity is seen with FHR 173 bpm
- #> NT appears normal measuring 1.2 mm. Nasal bone is seen.
- #> Ductus venosus flow appears normal.
- #> Cervical length is normal, measures 3.7 cm. Internal os is closed.
- #> No free fluid in Cul-De-Sac.
- #> EDD is assigned as per LMP - 29/10/2022

	Right Uterine Artery	Left Uterine Artery	Mean
P.I. Values	1.1	1.7	1.4 (27 th percentile) - Normal

IMPRESSION:

Sonic findings suggest single intra-uterine live pregnancy of 11 weeks 6 days gestational age. NT appear normal.

Note: All congenital malformations cannot be rule out at this gestational age. Detection depends on the lie, position, amount of liquor & fetal presentation at the time of sonography This scan does not include fetal ECHO

I have neither detected nor disclosed the sex of Her Foetus to any body in any manner.
