- Single Live Intrauterine Fetus with Sonic Maturity of 18-19 wks.
- Variable Presentation in present scan.
- Placenta is posterior, grade I, no previa.
- Amniotic fluid is adequate for gestational age.
- No obvious fetal anomaly noted in present scan.
- Internal os is closed.
- Advice fetal echo for detail cardiac examination.

All measurements including estimated foetal weight are subject to statistical variations.
Not all anomalies can be detected on sonography. Much of them depends on position of fetus at the time of sonography.
I have neither detected nor disclosed sex of fetus to anybody in any manner.
