Reg. No. 083558 **Consultant in FETAL MEDICINE**
& **RADIOLOGIST Certified fellow SCHOLAR MD, INDIA.**

Patient Name	MRS. PALLAVI PADOLE	Age /sex	27 YRS/F
Referred by	DR. PRIYANKA POTE MBBS	Visit date	23-06-2022
LMP	26-03-2022	LMP EDD	31-12-2022
LMP GA	12W 5D	AUA GA	12W 3D

Early pregnancy (Nuchal Scan) USG report

Real time b mode ultrasonography done via transabdominal route by Samsung

INDICATION : NT SCAN

A single live intrauterine gestation seen with spontaneous movements.

Liquor appears to be adequate for gestation.

Cardiac activity seen with FHR 155 BPM.

Flow across tricuspid valve and Ductus venosus (PI – 1.01) is normal.

Biometry

PARAMETER	MEASUREMENTS(cm)	GESTATIONAL AGE
B.P.D.	1.8	12W 6D
HC	7.0	12W 6D
AC	6.0	12W 6D
C.R.L	5.9	12W 3D

Nuchal Translucency measures 1.0 mm.

Intracranial translucency appears normal.

Nasal bone meas. 0.27 (52.5 %tile) and retronasal triangle seen.

Bladder and stomach bubble seen.

All four limbs with spontaneous movement seen.

Spine, facial skeleton forming. Midline falx seen

L.m.p - 26/3/22

Weight - 54kg

Height - 5'6

P.T.O.

23374117

Placenta forming – POSTERIOR , Not low lying

Internal OS closed.

No evidence of any sub chorionic collection at present.

Cervical length appears normal and measures 4.4 cm (OS closed.) Transabdominal

Uterine Artery Doppler (Pulsatility Index)

Right Uterine Artery PI	Left Uterine Artery PI	Mean uterine artery PI:
2.30	2.41	2.3
PERCENTILE 93 WITHIN THE LIMITS OF NORMAL		

(Ref percentiles: fetal medicine Barcelona)

Impression: Single live intrauterine gestation Gestational age of 12wks 3days with Nuchal translucency of 1.0mm

ASSIGNED EDD AS PER LMP : 31/12/2022

(Detailed Anomaly scan suggested @ 18-20 weeks)

Dr. MANISHA BHAWATKAR,
MBBS, DMRE.

FMF (UK) CERTIFIED

Consultant RADIOLOGIST and FETAL MEDICINE SPECIALIST

TRAINED AT CIMAR FETAL MEDICINE AND INFERTILITY CENTRE, COCHIN.

TRAINED FOR FETAL ECHO AT MEDISCAN, CENNAI.

Many Thanks for the referral

Declaration of doctor/person conducting ultrasonography/image scanning.

I, Dr. ASHISH BHAWATKAR, declare that while conducting ultrasonography, I have neither detected nor disclosed the sex of the fetus to anybody in any manner.

P.S It must be noted that detailed fetal anatomy may not always be clear due to technical difficulties related to advanced gestational age, fetal position, reduced liquor, maternal abdominal wall thickness fetal movements etc. therefore all fetal anomalies may not be detected)
