

USG - OBG NT

Name of Patient : MRS. SWATI MESHARAM22
Ref. by : AIIMS

233790 ~~00~~ 79

LMP: 07/25/2022	Menstrual Age	12 weeks 6 days
-----------------	---------------	-----------------

Single intrauterine gestation sac with single fetus showing regular cardiac activity.

Fetal heart rate 164 bpm regular and is normal.

CRL	7.1 CM
Sonic Gestational Age	13 weeks 1 day
Sonic EDD (usg wise)	09/02/2023

NT: 1.2 mm

NB present.

All four limbs reveal no abnormality.

Spine reveals no abnormality.

DV shows normal flow.

Liver is adequate for gestational age.

Cervical length & internal OS is normal appearing.

DOB - 18/11/2000

Wt 41 kg

ht - 5.2 feet

Dual marker

OPINION: -

- ☐ Single live intrauterine fetus of sonic GA -13 weeks 1 day near corresponding with menstrual age.
- ☐ At present no sonographic abnormality noted.

I, Dr. Manish G. Atey declare that, while conducting ultrasonography on above patient, have neither detected nor disclosed the sex of the fetus to anybody in any manner.

Thanks for referral.

Note: All measurements including estimated foetal weight are subject to statistical variations. The gray scale 2D ultrasonography has its limitations and hence all congenital anomalies cannot be ruled out on this report alone and further evaluation is desirable.
