USG DURING PREGNANCY

LMP - 17/5/2022 GA(LMP) - 14 WEEKS

Gravid uterus shows single viable fetus.

Fetal movements seen. Fetal heart rate is 155 beats/min.

GA is about 13 to 14 weeks by fetal parameters,

CRL - 7 cm, BPD - 2.2 cm & FL - 1 cm.

Placenta is anterior.

Amniotic fluid is normal.

NT measured 1.5 mm. Fetal nasal bone seen.

No obvious demonstrable anomaly seen at present.

(all abnormalities can not be excluded.)

IOS is closed.

OPINION : Gravid uterus with a single viable fetus of
GA about 13 to 14 weeks. Normal interval
Growth seen in keeping with previous USG report.
Needs follow up.

I have neither detected nor disclosed the sex of fetus to anybody in any manner.
