Aaradhya Women's Hospital

Sudampuri, WARDHA - 442001

We have neither detected nor disclosed the sex of her baby to anybody in any manner.

- All congenital anomalies are not detectable sonologically. Some of them are due to patient of foetal factors.
- All measurements including estimated foetal weight are subjected to statistical variation.
- This Sonography report is not valid for medicolegal purpose. Sonography has its own machinery limitations.
- Minor surface anomalies or single isolated anomalies such as foot, palm extremities, eye and face disfigurement may be missed on repeated scan also.
