- #> No free fluid in Cul-De-Sac.
- #> EDD is assigned as per LMP - 22/06/2023

DOB: 10/10/1991  
weight. 57 kg  
LMP. 15/9/2022

23439821

	Right Uterine Artery	Left Uterine Artery	Mean
P.I. Values	0.71	0.9	0.80 (Normal )

**OPINION:**

Sonic findings suggest single intra-uterine live pregnancy of 12 weeks 4 days gestational age. NT appear normal.

I have neither detected nor disclosed the sex of Her Foetus to any body in any manner

**Disclaimer-** This investigation has been done as per request of the referring doctor.

It must be noted that detailed fetal anatomy may not always be visible due to technical difficulties related to fetal position, amniotic fluid volume , fetal movements and maternal abdominal wall thickness. Not all fetal anomalies can be detected at every examination. . All measurements are subject to statistical variations .
