## Summary

| Patient data    |              | Risks at term              |        |
|-----------------|--------------|----------------------------|--------|
| Age at delivery | 28.2         | Biochemical risk for Tr.21 | 1:7766 |
| WOP             | 14 + 2       | Age risk:                  | 1:1146 |
| Weight          | 66.7 kg      | Neural tube defects risk   | 1:5064 |
| Patient ID      | Mrs. B. SUMA |                            |        |
| Ethnic origin   | Asian        |                            |        |

|                                                                                                                                                                                 |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |

| <p>For 0312301020015 TWIN B, born on 14-04-1995, a screening test was performed on the 02-01-2023. Prisca screens for Trisomy 21, Trisomy 18 and Neural tube defects (NTD).</p> |  | <h3>TRISOMY 21 SCREENING</h3> <p><b>The calculated risk for Trisomy 21 is below the cut off which represents a low risk.</b></p> <p>After the result of the Trisomy 21 test it is expected that among 7766 women with the same data, there is one woman with a trisomy 21 pregnancy and 7765 women with not affected pregnancies.</p> <p>The risk for this twin pregnancy has been calculated for a singleton pregnancy with corrected MoMs.</p> <p>The calculated risk by PRISCA depends on the accuracy of the information provided by the referring physician.</p> <p>Please note that risk calculations are statistical approaches and have no diagnostic value!</p> |  |
