Reg. No. 51278

డా॥ మూల అవర్ణ రెడ్డి
Reg. No. 51278

PT'S NAME: KEERTHI AGE: 26 Y/F DATE: 29.01.2023
REF BY DR: TRIVENI MS OBG

EARLY OBG SCAN WITH NT

Uterus bulky with single regular gestational sac.
Yolk sac present.
Fetal pole present.
Fetal movements present.
Fetal cardiac activity present. FHR: 167 BPM.

Placenta left lateral grade 0 lower segment

CRL : 6.08 cm 12 weeks 4 days.
EDD : 09/08/2023
NT : 1.50 mm (within normal limits)
Nasal bone : 0.18 cm
CX : 4.0 cm

Visualised fetal parts appear normal

Ductus venous doppler show normal forward wave form with spectral pattern without reversal.

Tricuspid shows normal forward flow no regurgitation

Both uterine arteries show normal colour flow & spectral pattern.
E/o end diastolic notches seen ? physiological

Impression : Early gestation of 12 weeks 4 days gestational age with normal NT and normal DV,TV, Uterine arteries spectral forms

advised double marker

DR. RAPARNA
RADIOLOGIST

I Dr. RAPARNA declare that while conducting USG on KEERTHI Z J Y/F I have neither detected nor disclosed the sex of the fetus to anybody in any manner. Note: all anomalies cannot be ruled out by ultra sound, since assessment of fetal anomalies depends on the limitations of ultrasonography and period of the time of performance of scan. Subtle lesions produced by both SP & abnormal tissue. Distinctly diverse diseases produce similar shadows, hence this report is not for confirmation for the diagnosis and only represents part of professional opinion in some of the various abilities and number of variables known & unknown does exist.

Note: The presence of fetal position in all regions and areas of the body is not a reliable indicator of fetal anomalies. Normal & abnormal findings. Distinctive diverse diseases produce similar shadows, hence this report is not for confirmation for the diagnosis and only represents part of professional opinion in some of the various possibilities and number of variables known & unknown does exist.
