Impression : Early gestation of 13 weeks 3 days gestational age with normal NT and normal DV,TV, Uterine arteries spectral forms

DR. RAPARNA
RADIOLOGIST

Note : The science of the radiological diagnosis is based on the interpretation of various shadows produced by both lungs & supported by a number of factors. These factors are not always the same, hence the report is neither confirmation for the diagnosis, nor only represents part of professional opinion in some of the various possibilities and number of variables known & unknown does exist.
