PT'S NAME: DASARI SREELATHA AGE: 20Y/F DATE: 06. 03.2023

REF BY DR: TRIVENI MS OBG

EARLY OBG SCAN WITH NT

Uterus bulky with single regular gestational sac
Yolk sac present
Fetal pole present
Fetal movements present
Fetal cardiac activity present FHR : 157 BPM.

Placenta posterior grade 0 lower segment

CRL : 8.24 cm 14 weeks 1 days.
EDD : 03/09/2023
NT : 1.10 mm (within normal limits)
Nasal bone : 0.23 cm.
CX : 3.0 cm

Visualised fetal parts appear normal

Ductus venous doppler show normal forward wave form with spectral pattern without reversal.

Tricuspid shows normal forward flow no regurgitation

Both uterine arteries show normal colour flow & spectral pattern.

E/o end diastolic notches seen 7 physiological

Impression : Early gestation of 14 weeks 1 days gestational age with normal NT and normal DV,TV, Uterine arteries spectral forms

advised double marker

DR. RAPARNA
RADIOLOGIST

(Dr RAPARNA declare that while conducting USG on SREELATHA 20Y/F I have neither detected nor disclosed the sex of the fetus to anybody in any manner. Note: all anomalies cannot be ruled out by ultra sound, since assessment of fetal anatomy is dependent on fetal position, liquor volume, and the skill of the operator. The science of the radiological diagnosis is based on the appearance of various shadows which are produced by both normal & abnormal anatomy. Thus, many different diseases produce similar shadows, hence this report is not for confirmation for the diagnosis and only represents part of professional opinion in some of the various possibilities and number of variables known & unknown does exist.
