**Disclaimer**

I hereby declare that I do not detect or disclose the fetal sex to anybody in any manner.

Obstetric sonography is not 100% accurate for detection of anomalies.

This is a professional opinion based on ultrasound image interpretation. Detailed Fetal Echo is not a part of targeted anomaly survey, fingers and toes need not be counted in basic screening. Subtle anomalies which are not evolved / manifested at this GA can be missed (eg. CDH can present at any later GA or even post nataly)
