Reg. No. 51278

PT'S NAME: CHILAKARAJU SANDHYA AGE : 26 Y/F

DATE: 15. 02.2023

REF BY DR: TRIVENI MS OBG

### EARLY OBG SCAN WITH NT

Uterus bulky with single regular gestational sac

Yolk sac present.

Fetal pole present.

Fetal movements present.

Fetal cardiac activity present FHR : 179 BPM.

Placenta left lateral grade 0 lower segment

CRL : 6.26 cm 12 weeks 5 days.

EDD : 25/ 08 / 2023

NT : 1.10 mm (within normal limits)

Nasal bone : 0.16 cm.

CX : 3.1 cm

Visualised fetal parts appear normal

Ductus venous doppler show normal forward wave form with spectral pattern without reversal.

Tricuspid shows normal forward flow no regurgitation

Both uterine arteries show normal colour flow & spectral pattern.

E/o end diastolic notches seen ? physiological

Impression : Early gestation of 12 weeks 5 days gestational age with normal NT and normal DV,TV, Uterine arteries spectral forms

advised double marker

DR. RAPARNA  
RADIOLOGIST

Note : I Dr.RAPARNA declare that while conducting USG on SANDHYA 26 Y /F I have neither detected nor disclosed the sex of the fetus to anybody in any manner. Note: all anomalies cannot be ruled out by ultra sound, since assessment of fetal anomalies since of the radiological diagnosis is based on the interpretation of scan only. It should be understood that both normal & abnormal conditions can be seen. Diverse diseases produce similar shadows, hence this report is not for confirmation for the diagnosis and only represents part of professional opinion in some of the various possibilities and number of variables known & unknown does exist.
