**IMPRESSION :**

Single live intrauterine gestation of 12 weeks 6 days.

NT scan is normal.

Suggest anomaly scan at 18-22 weeks of gestation.

All congenital anomalies are not detected by sonography and are subject to fetal position and advanced gestational age. All measurements including birth weight are subject to statistical variations.

\* I **MRS. GAURI SHINDE**, declare that by undergoing ultrasonography/image scanning etc. I do not want to know the sex of my foetus.

Signature of pregnant women \* G.s.shinde

I, **DR. AMARJA MANE**, declare that while conducting ultrasonography/image scanning etc. on **MRS. GAURI SHINDE**. I have neither detected nor declared sex of her foetus to anybody in any manner.
