

SHREE DIAGNOSTICS

Choudhary Sweets Lane, Near UCO Bank, Samanpura, Raja Bazar, Patna-800014

REPORT OF M-MODE / 2-DIMENSIONAL / DOPPLER / COLOUR FLOW MAPPING /
CONTRAST ECHOCARDIOGRAPHY,

Name : MRS. ANJALI DEWANGAN

LMP:- 26.11.2022

Date : 08.04.2023

Age Years

Refd. By : DR. AMITA BHARTI MBBS, MS

USG FOR FETAL WELL BEING (LEVEL II)

FETAL BRAIN : Appears sonographically normal. Atrial width—5.7mm. Cisterna magna -5.1mm. Transverse cerebellar diameter—18.2mm. Nuchal thickness— 3.11mm.

FETAL FACE:- No evidence of cleft lip. Inter orbital diameter—7.6mm. Nasal bone—6.1mm.

FETAL HEART: Normal 4 chamber heart with normal situs, rate & rhythm. Levocardia. Normal RVOT & LVOT noted. However, study does not include a detailed fetal echo scan.

FETAL ABDOMEN:-Appears sonographically normal. Normal cord insertion, normal echogenicity of bowel loops. Gastric shadow seen. Peritoneum appears normal. No evidence of ascites.

FETAL KIDNEYS: Both kidneys appear normal. No evidence of calyceal dilatation in either kidneys.

FETAL U. BLADDER:- Normal distended.

FETAL SPINE: Ossification centre are parallel. Sacral tapering seen. Overlying skin line intact. No evidence of neural tube defect seen.

FETAL LIMBS: Limbs fore & hind limbs appear normal. Normal orientation to trunk. No bowing seen. The proximal & distal segments appear normal. No evidence of polydactyly/syndactyly. Normal ossification noted

UMBILICAL ARTERY: Normal colour flow study of umbilical arteries.

MIDDLE CEREBRAL ARTERY: Normal flow.

DUCTUS VENOSUS: Normal forward flow seen throughout the cycle.

BOTH UTERINE ARTERIES: Normal low resistance high diastolic flow seen in both uterine arteries.

IMPRESSION: (1) Sonographically normal study. No evidence of sonodetectable anomaly seen. Normal colour Doppler study of vessels.

Note-Level II scan has technical limitations inherent to ultrasound & its quality is further affected by maternal obesity, amount of liquor, fetal position & gest. age at the time of evaluation. Anomalies of the gut such as distal small bowel & large bowel atresias may not be diagnosed during level II scan owing to gest. age. In literature, level II has sensitivities ranging from 85-96% so results should always be seen in this perspective.

Dr. Jaishree
M.B.B.S., M.R.D.
CONSULTANT RADIOLOGIST
& SONOLOGIST

Radiologist

Dr. Jaishree
MBBS, DMRD
Reg. no. BCMR 31018

Facilities : • ECG • Digital X-Ray (300 MA Siemens) • All Contrast Studies (IVP, RGU-MCU, HSC etc.)
• USG (Ultrasound) + Colour Doppler • Echo Doppler • Trans Vaginal USG (TVS) • Vascular Doppler • TMT • PFT • Holter
Time : 9.30 AM to 7.30 PM (Monday to Saturday); 9.30 AM to 1.30 PM (Sunday)

(Please co-relate clinically, not for medico-legal purpose)
