#### OPINION:

SINGLE LIVE INTRAUTERINE FOETUS WITH SONIC MATURITY OF 12-13 WKS.  
SONIC EDD - 18/11/2023

| CRL  | NT   | PERCENTILE |
|------|------|------------|
| 5.96 | 0.18 | 68         |

(Ref - FMF calculator)

All measurements including estimated foetal weight, are subject to statistical variations.  
Not all anomalies can be detected on sonography. Much of them depends on fetal position at the time of sonography.  
I have neither detected nor disclosed sex of fetus to anybody in any manner.
