M Name: PRIYANKA AGE: 24 Y/F DATE: 26.05.2023

Ref by Dr. TRIVENI MS OBG INDICATION: FWB

OBSTETRIC ULTRA SOUND SCAN

Single live intrauterine gestation noted with unstable presentation at the time of scan
 Fetal cardiac activity noted HR = 145 BPM
 Fetal movements noted
 Liquor is adequate, clear
 Placenta is anterior grade 0 maturity lower segment
 No / o Cord around neck present

FETAL BIOMETRY

BPD	:	3.44 cm	16 wks 4 days
HC	:	11.93 cm	15 wks 6 days
AC	:	9.49 cm	15 wks 4 days
FL	:	1.82 cm	15 wks 3 days
CGA	:	15 weeks 6 days	
EDD	:	11/11/ 2023	
FW	:	128 gm +/- 19 gm	
CX	:	3.1 cm NF: 3 mm	

IMPRESSION :

Single live Intrauterine fetus of 15 weeks 6 days gestational age+ / - 2 weeks

NT not possible due to advanced GA. Ideal time is 11-14 weeks

Advanced TEPPA 24wks

DR. RAPARNA
RADIOLOGIST

I Dr. RAPARNA declare that while conducting USG on PRIYANKA 24 Y/F, I have neither detected nor disclosed the sex of the fetus to anybody in any manner. Determination of fetal sex is illegal (section PNWD ACT 1954).

Notwithstanding sincere search all anomalies cannot be ruled out by ultra sound, since assessment of fetal anomalies depends on fetal position, liquor volume, maternal obesity and period of gestation at the time of scan.

The scan is performed for obstetric purposes only and is not intended for the detection of various shadows produced by both normal and abnormal fetuses. ASD, PDA, etc. cannot be ruled out by this scan. Hence this report is not for confirmation of the diagnosis. Please consult a specialist for further evaluation. Hence USG has its own limitations. Please consult a specialist for further evaluation. Hence USG has its own limitations. Please consult a specialist for further evaluation.
