SONOGRAPHY GUIDED BIOPSY OF RIGHT BREAST LESION

After explaining procedure to patient and obtaining valid consent, Under aseptic precaution with USG Guidance, right breast biopsy was performed by using 18 G biopsy gun for diagnostic purpose. The sample was obtained from the upper outer quadrant lesion in right breast (10-11 o clock) multiple places of lesion

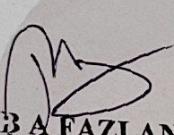

Patient tolerated the procedure well. Procedure was uneventful.

Patient was kept under observation after the procedure.

Biopsy samples were sent for lab investigations.

Post procedural USG revealed no obvious collection in left breast

Follow-up is suggested and in case of emergency inform us on 9421586752
