FETAL ANOMALY SCAN

LMP: 05.02.2023

GA by LMP: 19 Weeks 04 Days.

EDD by LMP: 12.11.2023

Single intrauterine live pregnancy. Unstable lie. Active fetal movement seen.

Biometry:

Fetal parameters-		Weeks	Days
BPD	44.10 mm	19	02
HC	164.59 mm	19	01
AC	134.14 mm	18	06
FL	28.77 mm	18	06
CGA	19 Weeks 00 Day. ✓		
EDD	16.11.2023 ✓		
FETAL WEIGHT	264 g.		
AMNIOTIC FLUID VOL.	Normal, maximum vertical pocket measures 3.78 cm. ✓		
FHR	147 bpm, regular ✓		
FETAL PRESENTATION	Unstable lie.		
PLACENTA	Anteriorly located, grade I in maturity. No evidence of retroplacental hemorrhage. Lower margin of placenta is well above the internal OS. ✓

FETAL ANOMALY SCAN

Head: Normal skull shape

Brain: Hemispheres, ventricles, mid brain, and posterior fossa appear normal.

Tran's cerebellar diameter: 19.23 cm

Cisterna magna: 6.48 cm

Nuchal fold: 3.54 mm

Lateral ventricles: 7.02 mm & 7.10 mm.

Face: No facial cleft. The eyes, nose and mandible appear normal. Nasal bone present.

Spine: Normal. No spina bifida or kyphoscoliosis. No focal lesion.

Thorax: Thorax and lungs appear normal.

Heart: Heart: *An echogenic intracardiac focus is seen in left ventricle in 4-chamber view. All the chambers are normal in size. Any septal defect not seen. No asymmetry noted.*

Abdominal wall: No abdominal wall defect.

GIT: Stomach and GIT appear normal.

Urinary tract: Both kidneys are normal in size and echogenicity. *Left renal pelvis appears to be slightly dilated (5.38 mm)* and right renal pelvis is normal (3.38 mm). Urinary bladder appears to be normal.

Extremities: Hands, feet, arms, and legs appear normal.

Umbilical cord: Normal 3 vessels containing cord with central insertion.

IMPRESSION: - Single intrauterine live pregnancy with normal amniotic fluid volume .

- USG composite gestational age - 19 Weeks 00 Day.
- Uni lateral (left sided) mild pyelectasis and a intracardiac echogenic foci seen .
Suggested : Quadruple marker test correlation / further investigations and follow up .
- Any other gross congenital anomaly not detected at this stage.

Disclaimer : Detailed fetal echo is not a part of this scan

All the congenital anomalies cannot to be excluded by USG only .
