Suggest target scan at 19-20 weeks & follow up SOS / routine growth scan in late 2nd / early third trimester.

Declaration : I have neither detected nor disclosed the sex of the fetus to pregnant woman or to anybody. (It must be noted that foetal anatomy may not always be visible due to technical difficulties related to foetal position, amniotic fluid volume, foetal movements, maternal abdominal wall thickness & tissue echogenicity. Therefore all foetal anomalies may not be detected at every examination. Patient has been counselled about the capabilities & limitations of this examination.)
