Reg. No. 90678

• 2D / 3D / 4D SONOGRAPHY • DIGITAL X-RAY  
• WHOLE BODY COLOUR DOPPLER • 2D ECHO

Patient Name : Mrs. Supriya Babar  
Referred By : Dr. Khabale Shivajirao (MBBS DGO FCPS)  
Age : 26 Yrs. Sex : F  
Examination : USG Obstetric (Follow up).

Date : 10 Jul 2023

LMP 20-03-23.

EDD (by dates) 27-12-23.

Single live intrauterine pregnancy of AGA 16 weeks & 3 days is seen.

Amniotic fluid is adequate.

Anterior Grade I placenta. No previa.

Foetal stomach bubble was persistently small in size.  
Possibility of esophageal atresia with tracheo-esophageal fistula  
needs to be ruled out.

No other gross congenital anomaly seen.

Estimated foetal weight is 151 gms.

Internal os is closed. Cervical length is adequate (3.7 cm).

Sugg: -  
- Follow-up sos.

*Sex of the foetus is neither detected nor disclosed to anybody in any manner.  
This is not an anomaly scan.*

*Foetal survey is limited by foetal position, movements, quantity of amniotic fluid & thickness of maternal anterior abdominal wall. Hence all congenital anomalies / malformations are not detected by an ultrasound examination.*

  
**Dr. Abhijeet G. Thombare**  
Radiologist & Sonologist.

*Many thanks for reference.*
