

Patient Name:	Mrs. Neha Jain	Date of USG	12-June-2023
UHID No.	ASHB0000005650	LMP	25-02-2023
Age /Sex	33Years/ Female	GA by LMP	15w 2d
Referred by:	Dr.Sapna Bajaj Jain	GA by current USG	15w2d
Done by	Dr. Manupriya Madhavan	EDD by LMP/USG	02-12-2023/02-12-2023
Indication of Ultrasound: - Growth scan			
Single live fetus		Placental location	Anterior, Grade-0, away from OS
Fetal lie	Longitudinal	Liquor-	DVP- 2.31cm
Fetal Presentation	Variable		
Biometry-		Percentile	Other findings : Cervical Length: 4.08cm. Ductus venous –Normal Tricuspid regurgitation- Absent Both upper and lower limb seen.
BPD	15w5d	66.8%	
HC	15w1d	27.2%	
AC	15w1 d	48.3%	
FL	15w 2d	47.0%	
Estimated fetal weight	119g+/-17 gms	35.4%	
Fetal heart rate	154 bpm		

Impression: Single live intrauterine fetus of 15weeks 2 days.

Adv:- Quadruple marker at 16 weeks.

I, Manupriya Madhavan declare that while conducting ultrasonography on the patient, I have neither detected nor disclosed the gender of the fetus to anybody in any manner. Please also note that all congenital anomalies cannot be detected by ultrasound.

Reported by:-

Dr. Manupriya Madhavan
 Consultant in Maternal Medicine
 FMF UK ID-204410
 FETAL MEDICINE
 Reg. No. : 30392

Note - Ultrasound is a modality of diagnosis but it has its own limitations -

- It can detect structural malformations in up to 60-70% of cases depending on the organ involved.
- Functional abnormalities in the fetus cannot be detected by USG.
- Conditions like trisomy 21 (Down syndrome) may have normal ultrasound findings in 60% cases. Additional tests like serum markers (**double test at 11-13+6 weeks/Quadruple test at 16-20 weeks**) will help in detecting more number of cases (**80% by Quadruple test/90% by double test**)
- Subtle abnormalities like polydactyly and cleft palate are not looked up in a routine scan, which are surgically correctable after birth.
- Some conditions present late in intrauterine life and require serial follow up scans to rule out their presence.
- All the anomalies do not manifest in intrauterine life and may present postnatally for the first time.
