COMMENTS:

First Trimester Screening for Trisomies:

	Risk From History Only	Risk From History Plus NT, FHR
Trisomy 21:	1 in 909	1 in 5000
Trisomy 18:	1 in 2000	1 in 10000
Trisomy 13:	1 in 10000	1 in 10000

SUGGESTED:

Double marker correlation and TIFFA (level II) scan between 18-20 weeks.

Thanks for the reference,
With regards.

PLEASE NOTE

All abnormalities and genetic syndromes cannot be ruled out by ultrasound examination. Ultrasound examination has its own limitations. Some abnormalities evolve as the gestation advances. The pickup rate of abnormality depends on gestational age of the fetus, fetal position, tissue penetration of sound waves, and patient's body habitus.

Disclaimer:

I Dr. Manoj Jadhav declare that while conducting ultrasonography/image scanning on this patient, have neither detected nor disclosed the sex of her fetus to anybody in any manner.
