ULTRASOUND OF ABDOMEN AND PELVIS

Scan done on GE LOGIQ P6 Ultrasound system at Paras diagnostic Rajnandgaon.

The Real time, B mode, gray scale sonography was performed.

LIVER : The liver is normal in size and shape, it is uniformly isoechoic, has normally distributed and normal size biliary and portal radicles and is without solid or cystic mass lesion or calcification.

PORTAL VEIN : Portal vein is normal in size, hepatopetal flow.

GALL BLADDER : It is physiologically distended and lumen is echofree. no evidence of calculus or mass lesion is noted.

COMMON BILE DUCT : The common bile duct is normal in caliber.

PANCREAS : The pancreas is normal in size, shape, contours and echotexture. No evidence of solid mass lesion is noted.

SPLEEN : The spleen is normal in size and shape. Its echotexture is homogeneous. No evidence of mass lesion is noted.

KIDNEYS : The kidneys are normal in size and have smooth renal margins. cortical echotexture is normal with maintained corticomedullary differentiation. No evidence of calculus or hydronephrosis.

The right kidney measures 9.8 cm in length.

The left kidney measures 9.6 cm in length.

No peritoneal lymphadenopathy is seen.

No free fluid is seen in the peritoneal cavity.

MUCOSA : circumferential regular wall thickening with maintained mural stratification noted in the hepatic flexure (wall thickness 6 mm) - suggestive of ? infective / inflammatory thickening. Increased echogenicity noted in fatty tissue around hepatic flexure - suggestive of fatty infiltration.

Date : 06/08/2023

URINARY BLADDER : The urinary bladder is partially distended. It shows uniformly thin walls and sharp mucosa.

PELVIS :

The uterus is anteverted and appears normal in size.

Uterus measures - 6.3 x 4.2 x 3.0 cm. vol- 43 cc.

Myometrium and endometrium appear to be normal

Endometrium thickness - 5.2 mm.

No adnexal mass is seen.

No free fluid is noted in the cul-de-sac.

OPINION :

- ? Infective / inflammatory thickening in hepatic flexure (colitis).

Advice - Clinical correlation & Further evaluation as per clinical need.
