

Date: 11.09.2023

AGE: 28Y

SEX: FEMALE

PATIENT'S NAME: MRS. ANEESHA
REF. BY: DR. TOUSEEF JEHAN MP-49954

Obstetrical Ultrasonography for Twin's Pregnancy

Twin Intrauterine pregnancy is seen with Fetus - A and Fetus - B in breech presentation with single anterior placenta.
The fetal dimensions measured are:

	Fetus - A			Fetus - B		
BPD	76 mm	31 Weeks	0 Days	71 mm	28 Weeks	5 Days
HC	281 mm	30 Weeks	6 Days	280 mm	30 Weeks	5 Days
AC	254 mm	29 Weeks	4 Days	256 mm	29 Weeks	6 Days
FL	55 mm	29 Weeks	2 Days	57 mm	30 Weeks	2 Days
GA by LMP	30 weeks 1 days			29 weeks 6 days		
GA by USG	Lag 5 days			Lag 7 days		
Lag	Right lower			Left upper		
Position	Variable breech			Variable breech		
Presentation	Anterior			Anterior		
Placenta	Grade - II			Grade - II		
Maturity	Left lateral			Right lateral		
Spine	1447 grams			1482 grams		
EFW	19.11.2023			21.11.2023		
EDD	157 beats / minute			157 beats / minute		
Cardiac Pulsations	ADEQUATE					
Liquor (AFI)	3.4 mm					
Cervical Length	Appreciated			Appreciated		
Fetal Movements	Not appreciated			Loop270		
Cord Loop						

Assigned G.A by LMP is 30 weeks 6 days and Expected Date of Delivery: 14/11/2023.

All anomalies cannot be ruled out by this scan assessment of foetal anomalies depend on various factor USG makers for screening of chromosomal anomaly may not be always evident & such as their obscene may not totally ruled out the chromosomal activity. Patient has been counseled about the capabilities and limitations of this examination. This report does not include 2D echo of foetal heart. This report is only a professional opinion and not the diagnosis. It should be clinically interpreted by the clinician. This report is not valid for medico-legal purposes.

Radiological investigations have their own limitations. The above report is an opinion and not the final diagnosis This is to be co-related with clinical profile / investigations.
In case of any discrepancy a review may be asked.

Not for Medico Legal Purpose

Date: 11.09.2022

Impression: Real Time Obstetric USG Study Reveals:

- Two live fetuses in a separate intrauterine amniotic cavity with possibly common placenta with intervening septa; findings are suggestive of diamniotic monochorionic twin's pregnancy.
- Fetus-A 30 Weeks 1 Days Variable breech presentation Right Lower
- Fetus-B 29 Weeks 6 Days Variable breech presentation Left Upper
- Internal OS is closed. Cervical length is well maintained (3.4 cm).
- Placenta commonly located (Fetus – anterior) with separating membranes, grade II maturity away from internal OS.
- Solitary cord loop noted draped around neck region with sectoral involvement 270° on fetus A.
- No evidence of any concealed hemorrhage.

Declaration of Doctor / Person Conducting Ultrasonography / Image Scanning
I, DR. RITESH R. KUMAWAT declare that while conducting ultrasonography of MRS. ANEEL
I have neither detected nor disclosed the sex of her fetus to anybody in any manner.

Dr. Ritesh R. Ku
MBBS, DMRD, DNB (Radio D
