Reg. No. 51278

PT'S NAME: VIJAYA

AGE: 24Y/F

DATE: 13.09.2023

REF BY DR: TRIVENI MS OBG

EARLY OBG SCAN WITH NT

Uterus bulky with single regular gestational sac

Yolk sac present.

Fetal pole present.

Fetal movements present.

Fetal cardiac activity present FHR: 157 BPM.

Placenta right lateral grade 0 lower segment

CRL : 6.08 cm 12 weeks 4 days.

EDD : 23/03/2024

NT : 1.30 mm (within normal limits)

Nasal bone : 0.12 cm.

CX : 3.0 cm

Visualised fetal parts appear normal

Ductus venous doppler show normal forward wave form with spectral pattern without reversal.

Tricuspid shows normal forward flow no regurgitation

Both uterine arteries show normal colour flow & spectral pattern.

E/o end diastolic notches seen ? physiological

Impression : Early gestation of 12 weeks 4 days gestational age with normal NT and normal DV,TV, Uterine arteries spectral forms

advised double marker

**DR. RAPARNA
RADIOLOGIST**

I Dr. RAPARNA declare that while conducting USG on VIJAYA 24Y/F I have neither detected nor disclosed the sex of the fetus to anybody in any manner. Note: all anomalies cannot be ruled out by ultra sound, since assessment of fetal anomalies depends on fetal position, liquor volume and period of gestation at the time of scan. USG has its own limitations. Please cooperate clinically. Thanks for referral

Note : The science of the radiological diagnosis is based on the interpretation of various shadows produced by both normal & abnormal tissue. Dissimilar diverse diseases produce similar shadows, hence this report is not for confirmation for the diagnosis and only represents part of professional opinion in some of the various possibilities and number of variables known & unknown does exist.
