Report

III. Nasal bone seen.

- All long bones & paired bones normal.
- Hands & feet appears normal.
- Four chambered heart shows normal configuration of atria & ventricles
- Fetal kidneys normal (Rt, K. - 2.56 cms, Lt, K. - 2.60 cms), urinary bladder distended , normal.
- Stomach bubble is seen .
- Bilateral uterine arteries , show normal color flow and spectral pattern , No evidence of utero -placenta insufficiency seen at time of scan.

Impression :

- Single live intrauterine fetus with transverse towards left side presentation at the time of scan corresponding to a mean gestational age of 20 wks & 2 dys.
- Target scan reveals no gross congenital anomaly at the time of scan.
- Bilateral uterine arteries shows normal color flow and spectral pattern. No evidence of utero-placenta insufficiency seen at time of scan.

Dr. Santosh Raikwar have not disclosed the sex of the child to the patient. Please note that all anomalies cannot be detected all the times due to various technical and circumstantial reasons like gestation period, fetal position, quantity of liquor etc. The present study cannot completely confirm presence or absence of any or all the congenital anomalies in the fetus, which may be detected on post natal period. Growth parameters mentioned herein are based on International Data and may vary from Indian standards. Date of delivery (at 40 weeks) is calculated as per the present Sonographic growth of fetus and may not correspond with period of gestation by L.M.P. or by actual date of delivery. As with any other diagnostic modality, the present study should be correlated with clinical features for proper management.

Dr. Santosh Raikwar
MD Radiodignosis.

Report

Patient Name	Mrs.NEELU RAJPUT	Age/Sex	32 Y / F
Referred by	Dr.PRERNA THAPA	Date	12.09.2023

OBST. TARGET SCAN

- A single live fetus seen in intrauterine cavity with transverse towards left side presentation at the time of scan
- Placenta - Posterior upper & mid, away from OS , Grade-0 maturity.
- Fetal Parameters-

BPD	4.8 cm	20 wks 5 dys	+/- 1 wks 3 dys
HC	18.2 cm	20 wks 4 dys	+/- 1 wks 5 dys
AC	14.6 cm	20 wks 0 dys	+/- 1 wks 3 dys
FL	3.0 cm	19 wks 3 dys	+/- 1 wks 4 dys
Humerus length	3.0 cm	20 wks 1 dys	+/- 1 wks 3 dys
Ulna	3.0 cm	21 wks 4 dys	+/- 1 wks 3 dys
Tibia	2.6 cm	19 wks 4 dys	+/- 1 wks 3 dys

- LMP- 26-04-2023
- EDD-28-01-2024
- Mean Gestational Age 20 weeks 2 days.
- Liquor – Adequate, AFI 14-16 cms approx.
- FHR 145 bts/min, regular
- Advice : Fetal movement noted.
- EFW- 316 gm, +/- 47 gms
- Cervical length - 3.9 cms
- Head – I. Midline falx normal.
II. Both lateral ventricles normal.
III. Posterior fossa - : Trans cerebellar diameter (2.54 cms) is normal and nearly corresponding to weeks of gestation.
- Spine – I. Vertebrae normal.
II. Nuchal thickening normal.
- Face- I. Both Orbita normal.
II. Inter orbital distance normal (2 cms) .
