DECLARATION

I, Dr. Nishant, declare that while performing sonography/ Image scanning of 19 weeks, I have neither detected nor disclosed sex of the fetus to her or anybody in any manner (It must be noted that detailed fetal anatomy may not always be visible due to technical difficulties related to fetal position, amniotic fluid volume, fetal movements, maternal abdominal wall thickness and tissue echogenicity. Therefore all fetal anomalies may not necessarily be detected at every examination. Patient has been counseled about the capabilities and limitations of this examination)
