Reg.No.2012/09/2636

I Dr Umesh Surwase, declare that, sex of the foetus is neither detected, nor disclosed to anybody in any manner.

Mrs. POOJA RAJNIKANT KARVANDE declare that by under- going ultrasonography, I do not want to know that sex of my fetus, मी घोषित करते की, ही सोनोग्राफी बाळाचे लिंग तपसन्यासाठी केलेली नाही/किंवा गर्भालिंग जानून घेण्याची माझी इच्छा नाही, या तपासनीसाठी मी खड़ालेने समती देत आहे.

[NT scan is a part of screening for few chromosomal anomalies like Downs syndrome (Trisomy 21), other trisomies (13 & 18), cardiac & other fetal abnormalities. This is not a definitive diagnostic test for chromosomal anomalies. Dedicated combined screening (NT scan + biochemical markers OR NIPT) and other definitive tests are recommended in high risk group as per the universal guidelines].
