Reg. No. 51278

Dr. Moola Aparna Reddy
Reg. No. 51278

PT'S NAME : NEERAJA AGE : 27 Y/F DATE : 17.11.2023
REF BY DR: TRIVENI MS QBG

EARLY OBG SCAN WITH NT

Uterus bulky with single regular gestational sac
Yolk sac present.
Fetal pole present.
Fetal movements present.
Fetal cardiac activity present FHR : 170 BPM.

Placenta right lateral grade 0 lower segment

CRL : 5.29 cm 12 weeks 0 days
EDD : 31/05/2024
NT : 1.37 mm.
Nasal bone : 0.18 cm
CX : 3.4 cm

Visualised fetal parts appear normal

Ductus venous doppler show normal forward wave form with spectral pattern without reversal.

Tricuspid shows normal forward flow no regurgitation

Both uterine arteries show normal colour flow & spectral pattern.
E/o end diastolic notches seen ? physiological

Impression : Early gestation of 12 weeks 0 days gestational age with normal NT and normal DV,TV, Uterine arteries spectral forms

Advised double marker

DR. RAPARNA
RADIOLOGIST

I Dr. RAPARNA declare that while conducting USG on NEERAJA 27 Y/F.
I have neither detected nor disclosed the sex of the fetus to anybody in any manner.

Note: all anomalies cannot be ruled out by ultra sound, since assessment of fetal anomalies depends on fetal position, liquor volume and period of gestation at the time of scan. USG has its own limitations. Please correlate clinically. Thanks for referral

Note : The science of the radiological diagnosis is based on the interpretation of various shadows produced by both normal & abnormal tissue. Dissimilar diverse diseases produce similar shadows, hence this report is not for confirmation for the diagnosis and only represents part of professional opinion in some of the various possibilities and number of variables known & unknown does exist.

మంచి మనసుతో ఆలోచిద్దాం - మన ఇంటికి రాబోయే మహాపక్షిని రక్షిద్దాం.
