

Dr. Surabhi Dube

MD (Obstetrics & Gynecology), DNB,
FNB (High Risk Pregnancy & Perinatology)
Former Fellow in Fernandez Hospital, Hyderabad
Maternal & Fetal Medicine Consultant
Reg. No. MP 12415

Diagnosis : Intra-cardiac echogenic foci seen in left and right ventricle. No obvious anomaly seen for the period of gestation

Comments : Today's ultrasound has revealed single live fetus with gestational age of 20 weeks and 5 days. There are no obvious structural defects at this period of gestation. The fetal growth and liquor appear adequate.

Couple explained regarding Intra-cardiac echogenic foci seen in left and right ventricle.

However the couple is aware that ultrasonography cannot exclude all the chromosomal abnormalities or genetic syndromes.

I, Dr. Surabhi Dube, declare that while conducting the ultrasonography/ image scanning of Ms. Reena Sahu, neither detected nor disclosed the fetal gender to anybody in any manner.

Note : Assessment of fetal anomalies depends on fetal position, liquor volume and period of gestation at the time of scan, hence all anomalies cannot be excluded by ultrasonography.

Surabhi
