Study: OBST FETAL ECHO
Examined By: Dr. YATIN VISAVE

FETAL ECHOCARDIOGRAPHY / ULTRASOUND EXAMINATION OF GRAVID UTERUS DONE.

E.D.D-15.02.24

G.A - 26 WKS 1 DAYS

M.P - 11.05.23

Study reveals single normal living foetus in longitudinal cephalic lie with spine towards Left and Anterior. Foetal respiratory movements are normal. Foetal trunk and limb movements are normal. Foetal cardiac pulsations are well recorded on M mode. Foetal heart rate is 148 beats per minute.

Placenta is posterior and shows grade II maturity, safely away from the Os. Amniotic fluid - Adequate, vertical height of the largest pocket of amniotic fluid is 4.4 cms. Amniotic fluid index is 12.6 CMS. Internal os is closed. Cervical length is 3.3 cms. Adequate.

Pre-brain hemispheres, thalami, ventricular system, septum pellucidum, cerebellum are normal. Fetal spine grossly appears normal. Both the kidneys are seen. Fundic bubble noted. No cystic or solid mass seen in abdomen. Long bones appear normal. Umbilical cord is three vesselled and normal.

FETAL PARAMETERS ARE AS FOLLOWS:

Bi-parietal diameter	: 66 mm	(26 weeks and 5 days)
Occipital length	: 47 mm	(26 weeks and 0 days)
Frontal length	: 45 mm	(28 weeks and 6 days)
Suboccipital length	: 23.3 mm	(26 weeks and 6 days)
Abdominal circumference	: 246 mm	(27 weeks and 4 days)
Head circumference	: 22	
AC ratio	: 72	
BPD ratio	: 79	
Phallic index	: 1008 gms. +/- 10 %	
Estimated foetal weight	: 26 weeks and 4 days	
Estimated gestational age	: 10.02.24
