Name : MRS. FATIMA ABDUL HANNURE
Ref By : Dr. VITKAR K.S. SIR

Age/Sex : 48 YEARS/F
Date : 29 Nov 2023

ULTRASOUND OF ABDOMEN AND PELVIS

LIVER : is mildly enlarged in size, measures 15.7 cm. The contours are smooth. The parenchyma shows diffuse homogeneous increase in echo-texture. The intra-hepatic portal & venous system appear normal. There is no focal mass lesion seen.

GALL BLADDER : is well distended and shows normal wall thickness. There is no calculus in gall bladder. There is no abnormal biliary tree dilatation noted. The portal vein measures 1cms & CBD measures 3mm.

SPLEEN : is normal in size. The contours are smooth. The splenic vein & portal vein are normal in caliber.

PANCREAS : is normal in size & echo-texture. The contours are smooth. There is no focal mass lesion seen.

KIDNEYS : Both the kidneys appear normal in size, shape, position and contours. There is no calculus seen in either kidney nor hydronephrosis. Both visualized ureters appear to be normal.

Urinary bladder shows normal shape, position and capacity. No intraluminal calculus or mass is seen. Normal wall thickness of the bladder is seen.

There is no ascites or para-aortic lymphadenopathy. The aorta and the I. V. C. appear normal.

Uterus is anteverted and normal, measures 6.6x5x4 cms. The contours are smooth. Endometrium appears diffused thickened and measures 30 mm in thickness. Few cystic changes are seen within it. No abnormal vascularity seen.

Both the ovaries are well appreciated appear normal. There is no cystic or solid adnexal mass lesion seen. There is no fluid in the pouch of Douglas.

IMPRESSION : Ultrasound findings show :

- Changes of diffuse cystic endometrial hyperplasia. Needs clinical and lab parameter, endometrial biopsy correlation,
- Mild hepatomegaly with grade II fatty infiltration of liver.
- No other significant imaging abnormality seen.

Thanks for referral.

With regards,

Dr. Amit Bhalke
