Sample Collected : JP050/24

Age: 46

Sex : M

Date : 24.1.2024
Time : 07:19 PM

Ex growth Rt. Buccal mucosa for histopath.
Sample received from Dev multi. sp. Hospital)

REPORT GROSS EXAMINATION

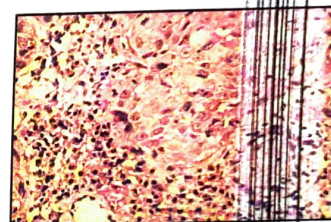

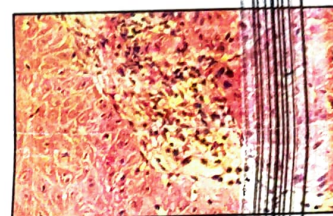

CO grey brown two bits of tissue 0.3 cms.

HISTOLOGY

Sections reveal tissue lined by dysplastic squamous epithelial cells with deepening of rete ridges with evidence of deeper invasion by groups of hyperchromatic cells with high N:C ratio with squamous differentiation with epithelial pearl formation and chronic inflammatory infiltrate.

DIAGNOSIS ::

Histologically suggestive of Well Differentiated Squamous cell carcinoma -
adv. clinical evaluation
