DR ROOPVARSHA JAIN
CONSULTANT RADIOLOGIST
REG.NO.10148

While conducting ultrasonography on mrs, **PRATIBHA** I have neither detected nor disclosed that sex of her fetus to anybody in any manner.

DR ROOPVARSHA JAIN
CONSULTANT RADIOLOGIST REG.NO.10148

Please note the limitations of Obstetric Ultrasound Scanning

- Scanning of the foetal anatomy can be affected by various factors like maternal abdominal wall thickness & tissue echogenicity, scars, fetal lie, amniotic fluid volume, fetal gestation and other factors.
- Therefore all the anomalies may not be necessarily be detected.
- A "Normal" scan of the fetus does not mean that the fetus will be normal at birth as the fetus is developing all the time.
- This report does not include 2D foetal echo.

THIS REPORT IS AN OPINION NOT THE FINAL DIAGNOSIS IT SHOULD BE CORRELATED CLINICALLY WITH HISTORY AND EXAMINATION OF THE PATIENT. IN CASE OF ANY DISCREPANCY A REVIEW CAN BE ASKED. NOT VALID FOR MEDICOLEGAL PURPOSES.
