Pt Name: ISHWARYA

AGE: 19 Y/F

DATE: 07.02.2024

Ref by Dr: TRIVENI MS OBG

INDICATION: TIFFA

OBSTETRIC ULTRA SOUND SCAN WITH TIFFA REPORT

Single live intrauterine gestation noted with cephalic presentation at the time of scan
Fetal cardiac activity noted HR = 157 BPM
Fetal movements noted
Liquor is adequate, clear
Placenta is posterior grade - I maturity upper segment
No e/o cord around the neck noted

FOETAL BIOMETRY

BPD	:	4.57 cm	19 wks 6 days
HC	:	17.47 cm	20 wks 0 days
AC	:	15.64 cm	20 wks 6 days
FL	:	3.09cm	19 wks 4 days
CGA	:	20 weeks 0 days	
EDD	:	26/06/ 2024	
BW	:	<u>338 gm</u> +/- 49 gm	
CX	:	3.1 cm ,internal os normal	

Continue---

Note : The science of the radiological diagnosis is based on the interpretation of various shadows produced by both normal & abnormal tissue. Dissimilar diverse diseases produce similar shadows, hence this report is not for confirmation for the diagnosis and only represents part of professional opinion in some of the various possibilities and number of variables known & unknown does exist.

Reg. No. 51278

TIFFA:

Head and neck:

Cerebellum, cisterna magna normal
Lateral cerebral ventricles are normal
Mid line falx, Cavum septi pellucidi seen
Nuchal fold thickness normal

Face:

Orbit, nose and lips normal, PMT seen

Chest:

E/o tiny echogenic foci noted in left ventricle

Heart 4 chamber view seen

Diaphragm, lungs normal

Abdomen:

Stomach bubble seen at left hypo chondrium with normal situs

Abdominal wall intact

Kidneys, bladder are normal

3 vessel cord with normal insertion noted

Spine: Normal

Extremities: Upper limbs & lower limbs are grossly appear normal

Both uterine arteries show normal colour flow & spectral pattern. No e/o end diastolic no

IMPRESSION:

-Single live intrauterine gestation of 20 week 0 days gestational age + / - 2 weeks

With intra cardiac echogenic foci (minor marker)

Advised FETAL ECHO

DR. R. APARNA
RADIOLOGIST

I Dr. R. APARNA declare that while conducting USG on ISHWARYA 19 Y/F. I have neither detected nor disclosed the fetus to anybody in any manner. Determination of fetal sex is illegal (section PNMT ACT 1994).

Note: Inspite of sincere search all anomalies cannot be ruled out by ultra sound, since assessment of fetal an depends on fetal position, liquor volume, maternal obesity and period of gestation at the time of scan.

In BOH with HTN Doppler studies are helpful in evaluating IUGR & viability

All GIT abnormalities & small VSD, ASD, PDA cannot be ruled out with this scan

UTERINE SCANS BEAR A LIMITED VALUE IN DETECTING CHROMOSOMAL ABNORMALITIES

Note : Hence USG has its own limitations. Please correlate clinically & produce your report

Normal & abnormal findings. Hence USG cannot be relied upon for a definite report.

confirmation for the diagnosis and only represents part of professional opinion in some of the

possibilities and number of variables known & unknown does exist.
