### **USG GUIDED FNAC**

**INDICATION:** Swelling in neck

**USG FINDINGS:** A well defined oval shaped isoechoic wider than taller nodule with internal cystic areas and peripheral hypoechoic halo measuring 29 x 23 mm in right lobe of thyroid. No evidence of calcifications. Few small 4 to 9 mm similar nodules in both lobes of thyrois (right > left). TIRADS 2.

**PROCEDURE:**

- \* Under all aseptic precautions, USG guidance and local anesthesia, FNAC was done from the largest nodule in thyroid
- \* 4 slides were prepared and sent for analysis.
- \* Procedure was uneventful.
