AC : 14.44cm 19 wks 5 days

FL : 3.07 cm 19 wks 4 days

CGA : 19 weeks 4 days

EDD : 26 / 07 / 2024

EFW : 304 gm +/- 44 gm.

CX : 3.1 cm , Internal os: normal

Continue---

Note : The science of the radiological diagnosis is based on the interpretation of various shadows produced by both normal & abnormal tissue. Dissimilar diverse diseases produce similar shadows, hence this report is not for confirmation for the diagnosis and only represents part of professional opinion in some of the various possibilities and number of variables known & unknown does exist.

3 vessel cord with normal insertion noted**Spine: Normal****Extremities: Upper limbs & lower limbs are grossly appear normal**

Both uterine arteries show normal colour flow & spectral pattern. No e/o end diastolic notches

IMPRESSION:-Single live intrauterine gestation of 19 weeks 4 days gestational age + / - 2 weeks
With no obvious anomaliesAdvised follow up scans to R/O progressive anomalies
Advised fetal echoDR. R. APARNA
RADIOLOGISTI Dr. R. APARNA declare that while conducting USG ON K. MANISHA 21Y.F. I have neither detected nor disclosed the sex of the fetus to anybody in any manner. Determination of fetal sex is illegal (section PNOT ACT 1994).
Note: Inspite of sincere search all anomalies cannot be ruled out by ultra sound, since assessment of fetal anomalies depends on fetal position, liquor volume, maternal obesity and period of gestation at the time of scan.Note: The scan of the abdomen and pelvis is done in the determination of various shadows produced by both normal and abnormal structures. All GIT abnormalities & small VSD, ASD, PDA cannot be ruled out with this scan.
The scan of the pelvis is done in the determination of various shadows produced by both normal and abnormal structures. All GIT abnormalities & small VSD, ASD, PDA cannot be ruled out with this scan.
The scan of the pelvis is done in the determination of various shadows produced by both normal and abnormal structures. All GIT abnormalities & small VSD, ASD, PDA cannot be ruled out with this scan.
