Impression:

USG study reveals presence of single live intrauterine gestation of average gestational age 13 weeks and 0 days.

Declaration :

I Dr Sumeet S Patrikar, declare that while conducting ultrasonography of Mrs. Manisha Vijay Nagare, I have neither detected nor disclosed the sex of her fetus to anybody in any manner.

Dr Sumeet S Patrikar
MBBS DMRE
Consultant Sonologist

(It must be noted that detailed fetal anatomy may not always be visible due to technical difficulties related to gestational age, fetal position, amniotic fluid volume, fetal movements and abdominal wall thickness. Therefore all fetal anomalies may not necessarily be detected at every examination).
