Reg. No. 51278

PT'S NAME : NIKHITHA AGE : 25 Y/F DATE: 24.03.2024

REF BY DR : TRIVENI MS OBG

EARLY OBG SCAN WITH NT

Uterus bulky with single regular gestational sac
Yolk sac present.
Fetal pole present.
Fetal movements present.
Fetal cardiac activity present FHR : 175 BPM.

Placenta left lateral grade 0 lower segment,

CRL : 4.38 cm 11 weeks 1 days.
EDD : 12/10/2024
NT : 0.96 mm
Nasal bone : 0.16 cm
CX : 3.5 cm

Visualised fetal parts appear normal

Ductus venous doppler show normal forward wave form with spectral pattern without reversal.

Tricuspid shows normal forward flow no regurgitation

Both uterine arteries show normal colour flow & spectral pattern.
E/o end diastolic notches seen ? physiological

**Impression : Early gestation of 11 weeks 1 days gestational age with normal
NT and normal DV,TV, Uterine arteries spectral forms**

Advised double marker

DR. RAPARNA
RADIOLOGIST

I Dr. RAPARNA declare that while conducting USG on NIKHITHA 25 Y/F.

I have neither detected nor disclosed the sex of the fetus to anybody in any manner.

Note: all anomalies cannot be ruled out by ultra sound, since assessment of fetal anomalies depends on fetal position, liquor

Note : The resolution of the period of gestation is based on USG which has its own limitations. Dissimilar diverse diseases produce similar shadows, hence this report is not for confirmation for the diagnosis and only represents part of professional opinion in some of the various possibilities and number of variables known & unknown does exist.
