DR. KAMOD KONDAWAR

MBBS, DMRE

Consultant Radiologist and Sonologist
MMC Reg. No. 2015/04/2115

Time : 9.30 am to 4.00 pm and 5.00 pm to 8.30 pm

Patients Name : MRS. MUMTAJ NAUSHAD SHEKH
Age : 34 YEARS / F
Referred by : Dr. SUMAIYA SHEIKH MADAM
Date : 09 Apr 2024
Examination : **USG – Obstetric NT Scan**

LMP – 01 Jan 2024. GA by LMP – 14w1d.

OBSERVATION:

- #> Urinary bladder partially full.
- #> Dichorionic diamniotic twin live intrauterine pregnancy.
- #> Fetal movements and cardiac activities of both the fetuses are well appreciated.
- #> Two separate placenta forming fundoanteriorly and fundoposteriorly are noted. Retroplacental zone appears normal.
- #> Amniotic fluid is adequate.
- #> Cervical length is normal, measures 3.6 cm. Internal os is closed.
- #> No free fluid in Cul-De-Sac.
- #> Right uterine artery PI – 1.04 Left uterine artery PI – 1.34. Mean PI – 1.19. (14 percentile - normal)

Fetus A

CRL	77.4 mm
GA by USG	13 Weeks 6 days
FHR	155 BPM

- #> NT appears normal measuring 2.1 mm (62 percentile – normal for this CRL).
- #> Nasal bone is seen.
- #> Ductus venosus flow appears normal.
- #> Normal choroid plexus, ventricles and falx. Skull vault, upper and lower extremities are visualized.

Fetus B

CRL	70.9 mm
GA by USG	13 weeks 2 days
FHR	156 BPM

- #> NT appears normal measuring 1.8 mm (39 percentile – normal for this CRL).
- #> Nasal bone is seen.
- #> Ductus venosus flow appears normal.
- #> Normal choroid plexus, ventricles and falx. Skull vault, upper and lower extremities are visualized.

Patients Name : MRS. MUMTAJ NAUSHAD SHEKH
Age : 34 YEARS / F
Date : 09 Apr 2024

IMPRESSION:

Sonic findings suggest dichorionic twin live intra-uterine pregnancy corresponding to 13 weeks 3 days gestational age.

Gestational age assigned as per CRL (previous scan dated 12/03/2024).

Assigned EDD - 12/10/2024.

NT for both the fetuses appear normal.

Suggested detailed anomaly scan between 18 to 23 weeks.

I declare that while undergoing ultrasonography/image scanning on this patient, I neither detected nor disclosed the sex of fetus to anybody in any manner.

All measurements including estimated fetal weight are subject to statistical variations.

THIS IS ROUTINE LEVEL ONE USG SCREENING & THIS DOES NOT INCLUDE FETAL ANOMALY SCANNING. FETAL ANOMALY SCANNING SHOULD BE ADVISED TO PATIENT AS PER CLINICAL NEED.

Not all anomalies can be detected on sonography. This scan does not include fetal ECHO.

Investigations have their limitations. Solitary radiological / pathological and other investigation never confirm the final diagnosis of disease. They only help in diagnosing the disease in correlation to symptom and other related tests. Please interpret accordingly.
