## USG PELVIS (TVS)

**Uterus:** Anteverted in position normal in size, shape and echotexture. Uterus measured 13.9 cms x 9.1 cms x 9.4 (630 cc) Bulky. Myometrium appear mildly heterogeneous.

A large intramural fibroid is noted measuring 8.5 cm x 7.6 cm x 8.7 cm (299 cc) involving right Postero-lateral myometrium. The fibroid is seen displacing and encroaching the endometrium.

**Endometrium:** Endometrial thickness measured 7.3 mm normal. No obvious evidence of any focal lesion within. Cu-T is noted in lower uterine segment.

**Cervix:** appear normal in size and echotexture. No focal lesion seen.

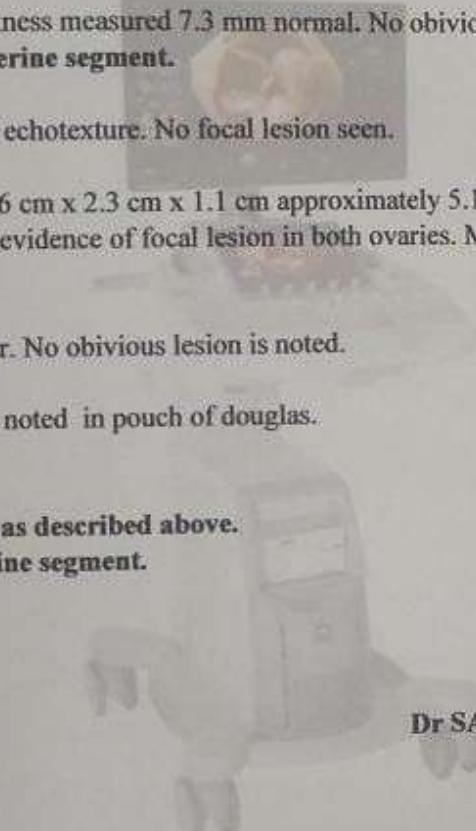

**Ovaries:** Left ovary measured 2.6 cm x 2.3 cm x 1.1 cm approximately 5.1 cc & Right ovary not visualised however right adnexa is clear. No evidence of focal lesion in both ovaries. Multiple small follicles are noted in both ovaries

**Adnexa:** Bilateral adnexa are clear. No obvious lesion is noted.

**Free Fluid:** Minimal free fluid is noted in pouch of douglas.

**Impression:**

- A large Uterine Fibroid as described above.
- Cu-T seen in lower uterine segment.
