PTS NAME : NEHA AFREEN

AGE : 24 Y/F

DATE: 23.04.2024

REF BY DR: THRIVENI MS OBG

**EARLY OBG SCAN WITH NT**

Uterus bulky with single regular gestational sac  
Yolk sac present.  
Fetal pole present.  
Fetal movements present.  
Fetal cardiac activity present FHR : 172 BPM.

**Placenta** left lateral grade 0 lower segment

|            |   |                |                  |
|------------|---|----------------|------------------|
| CRL        | : | 5.32 cm        | 12 weeks 0 days. |
| EDD        | : | 05 / 11 / 2024 |                  |
| NT         | : | 1.50 mm        |                  |
| Nasal bone | : | 0.12 cm        |                  |
| CX         | : | 3.2 cm         |                  |

Visualised fetal parts appear normal.

Ductus venous doppler show normal forward wave form with spectral pattern without reversal.

Tricuspid shows normal forward flow no regurgitation

Both uterine arteries show normal colour flow & spectral pattern.  
E/o end diastolic notches seen ? physiological

**Impression** : Early gestation of 12 weeks 0 days gestational age with normal NT and normal DV,TV, Uterine arteries spectral forms

Advised double marker

**DR. RAPARNA**  
RADIOLOGIST

I Dr. RAPARNA declare that while conducting USG on NEHA AFREEN 24 Y/F.  
I have neither detected nor disclosed the sex of the fetus to anybody in any manner.  
Note: all anomalies cannot be ruled out by ultra sound, since assessment of fetal anomalies depends on fetal position, liquor volume and period of gestation at the time of scan. USG has its own limitations. Please correlate clinically. Thanks for referral

**Note :** The science by the radiological diagnosis is based on the interpretation of various shadows produced by both normal & abnormal tissue. Dissimilar diverse diseases produce similar shadows, hence this report is not for confirmation for the diagnosis and only represents part of professional opinion in some of the various possibilities and number of variables known & unknown does exist.
