Doctors Lane, Ansari Colony, Nalgonda
డాక్టర్స్ లేన్, అన్సారి కాలనీ, నల్గొండ

డా. మూల అపర్ణ రెడ్డి

Reg. No. 51278

PATIENT'S NAME : NEELIMA AGE : 20 Y/F DATE: 22.05.2024
REF BY DR : TRIVENI MS OBG

EARLY OBG SCAN WITH NT

Uterus bulky with single regular gestational sac
Yolk sac present.
Fetal pole present.
Fetal movements present.
Fetal cardiac activity present FHR : 170 BPM.

Placenta right lateral grade 0 lower segment

CRL : 5.14 cm 11 weeks 6 days
EDD : 05/12/2024
NT : 0.90 mm
Nasal bone : 0.23 cm
CV : 3.4 cm

Visualised fetal parts appear normal

Ductus venous doppler show normal forward wave form with spectral pattern without reversal.

Tricuspid shows normal forward flow no regurgitation

Both uterine arteries show normal colour flow & spectral pattern.
No end diastolic notches seen ? physiological

**Impression : Early gestation of 11 weeks 6 days gestational age with normal
NT and normal DV,TV, Uterine arteries spectral forms
- Right ovarian simple cyst measures 2.7 x 2.4 cm
- Noised double marker**

**DR. APARNA
RADIOLOGIST**

DR. APARNA declare that while conducting USG on NEELIMA 20 Y/F
I have neither detected nor disclosed the sex of the fetus to anybody in any manner.
All anomalies cannot be ruled out by ultra sound, since assessment of fetal anomalies depends on fetal position, liquor
amount, etc. and it is not possible to detect all anomalies. This report is for information only and is not a substitute for clinical
examination for the diagnosis and only represents part of professional opinion in some of the various
possibilities and number of variables known & unknown does exist.

Note : The ultrasound is not a substitute for clinical examination. This report is for information only and is not a substitute for clinical
examination for the diagnosis and only represents part of professional opinion in some of the various
possibilities and number of variables known & unknown does exist.
