PFS NAME : SREELATHA AGE : 26 Y/F DATE : 19.05.2024

REF BY DR : TRIVENI MS OBG

EARLY OBG SCAN WITH NT

Uterus bulky with single regular gestational sac
Yolk sac present.
Fetal pole present.
Fetal movements present.
Fetal cardiac activity present FHR : 160 BPM.

Placenta anterior grade 0 lower segment,

CRL	:	6.50 cm	12 weeks 6 days.
EDD	:	25/11/2024	
NT	:	1.00 mm	
Nasal bone	:	0.23 cm	
CX	:	3.6 cm	

Visualised fetal parts appear normal

Ductus venous doppler show normal forward wave form with spectral pattern without reversal.

Tricuspid shows normal forward flow no regurgitation

Both uterine arteries show normal colour flow & spectral pattern.
E/o end diastolic notches seen ? physiological

Impression : Early gestation of 12 weeks 6 days gestational age with normal NT and normal DV,TV, Uterine arteries spectral forms

Advised double marker

DR. APARNA
RADIOLOGIST

I Dr. APARNA declare that while conducting USG on SREELATHA 26 Y/F.

I have neither detected nor disclosed the sex of the fetus to anybody in any manner.

Note: all anomalies cannot be ruled out by ultra sound, since assessment of fetal anomalies depends on fetal position, liquor

Note : The volume and quality of information on the sign of scan USG has its own limitations. Please correlate clinically. Thanks for referral
normal & abnormal tissue. Dissimilar diverse diseases produce similar shadows, hence this report is not for confirmation for the diagnosis and only represents part of professional opinion in some of the various possibilities and number of variables known & unknown does exist.
