- Placenta: Anterior left lateral, Grade-I.
- Ductus venosus reveals normal flow & spectral waveform.
- Left uterine artery show normal wave form and PI (0.74).
- Increased right uterine artery PI (1.87) with early diastolic notching. Mean PI is normal.

FETAL EXTREMITIES:

- All four limbs present with no gross abnormality.

FETAL HEAD:

- Mid line falx is well seen. Both lateral ventricles are normal in size. The posterior fossa appears normal. The cerebellum is normal.

(P.T.O.)

FETAL SPINE:

- Entire spine is visualized in longitudinal and transverse axis.
- The vertebrae and spinal canal appear normal.

FACE:

- Orbita, nose and mouth appear normal.

THORAX:

- The heart appears in normal cardiac situs.
- Solitary echogenic focus (2.0 mm) seen in right ventricle of heart is a soft marker for trisomy - Needs quadruple marker correlation.
- The four chamber view is normal. Fetal echo not done.
- Both lungs are well seen.
- No evidence of diaphragmatic hernia is seen.
- No evidence of pleural or pericardial effusion.

ABDOMEN:

- Abdominal situs appears normal.
- Stomach, both kidneys and urinary bladder are normal.

- Single live intrauterine foetus with Cephalic presentation is seen at the time of examination, which corresponds to gestational age 21 Weeks 4 Days. EDD- 14.11.2024 +/- 10 Days.
- Increased right uterine artery PI (1.87) with early diastolic notching. Mean PI is normal.
- Solitary echogenic focus (2.0 mm) seen in right ventricle of heart is a soft marker for trisomy - Needs quadruple marker correlation.
- No other obvious congenital anomaly detected.

Fetal echo is advised for dedicated evaluation of fetal heart (22-24 weeks)
Suggest clinical & Quadruple markers correlation.

Disclaimer:

Please note that USG study has certain limitations! sometimes fetal anomalies may not get diagnosed due to nature of anomaly, Gestational age, foetal positioning and limitations of machine thence absence of mention of foetal anomaly in study does not always rule out its possibility. (Fetal echo is not included in this scan).

Declaration:

I declare that while conducting Ultrasonography/ Image, Scanning on patient
I have neither detected nor disclosed the sex of her fetus to anybody in any manner.
